

A PLACE TO BE

CULTURE AS MAKING AND WORKING

Woodworking

Automotive

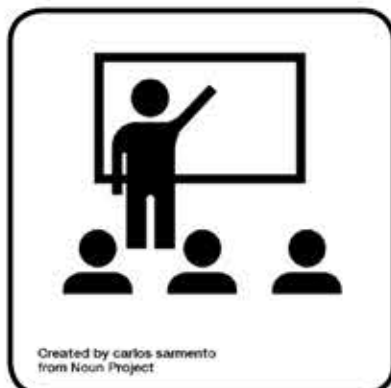

Business Storefronts

Event Space

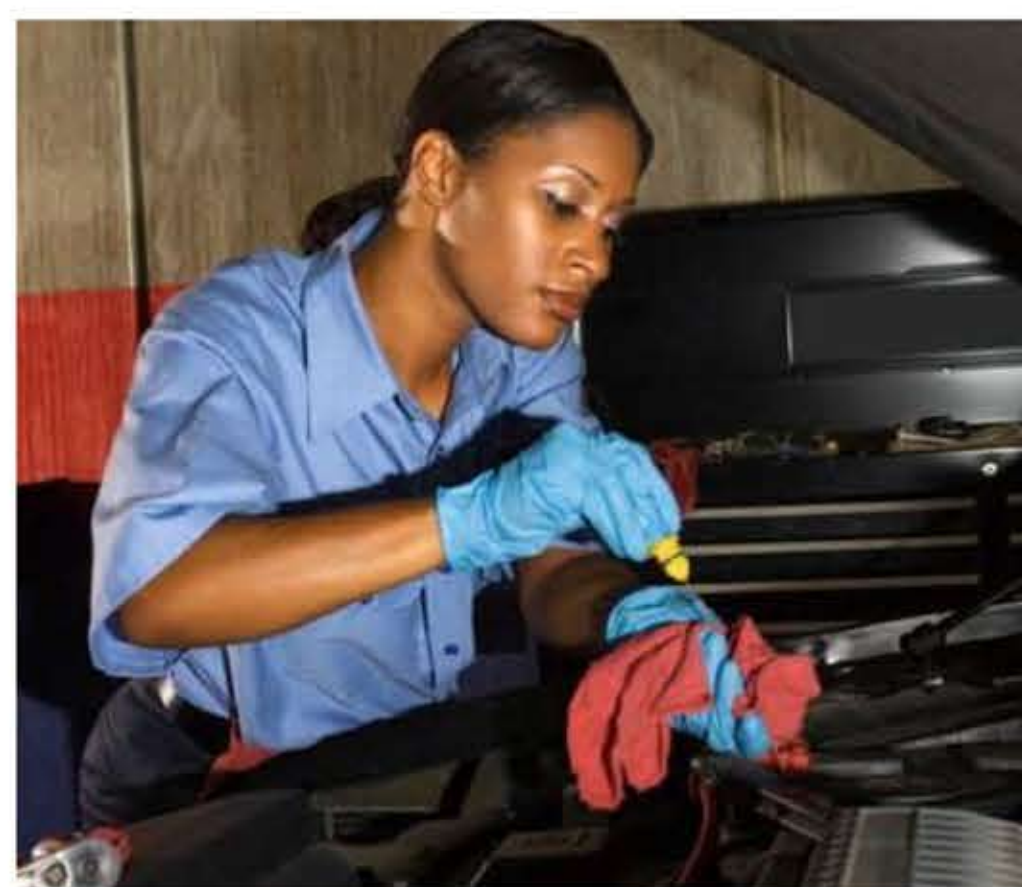

Job & Management Training

Small Business Support

Space for artisans to work on their craft provides an economic driver in the community, as well as the opportunity to transfer knowledge and skills from one generation to the next.

Hands-on skills like working on cars can provide a source of income or simply a greater sense of self-assuredness. Learning skills in community provides common ground and a positive environment.

Small business support and management training provides the additional skills needed to succeed in the workplace or to take a skill from hobby to income source.
