

Core Services

Counseling Facilities

Counseling services should offer spiritual healing for those impacted in the community. Training and career services should also be provided to empower people with new economic opportunities.

Business Storefronts

The program offers spaces for startup businesses. Facilities and resources (physical and educational) are provided to help a new business get off the ground and eventually move out to a bigger property to expand operation, continuing the cycle of business incubation.

Educational Services

A gathering space offers a venue for social events within the community, bringing more awareness for the kinds of businesses and ideas of entrepreneurship being created at the center.

Space for Social Events
